

## **Trân-Thi-Kim-Diêu's annual visit to Slovenia**

### **Report**

At the invitation of fellows at large in Slovenia, Trân-Thi-Kim-Diêu, Chairman of the European Federation of the TS, paid an annual visit to Slovenia with programmes taking place from 23 to 26 October 2015 in various towns.

On 23 October, a public lecture took place at the Slovenian Ethnographic Museum in Ljubljana on The Cycle of Truth. Some 25 listeners participated in the lecture in which the phenomenon of time and cycles was explored before examining the nature of time itself related with consciousness. After the lecture there was a vivid Q&A session with interesting discussion.

On 24 October, a day seminar was held at the Theosophical Library Alma Karlin in Celje on Exploring Karma, the Law of Laws. The hall of the library was completely filled with participants, both members and sympathizers, so the organizers had to provide some extra seats in another room to accommodate everybody. During two consecutive sessions, the notion of Karma was explored in depth. Even though this notion is well anchored in today's consciousness, the understanding is to be more clarified in order to move beyond sheer belief and reach the core of its significance. Both sessions were followed by thought-provoking discussions.

On 26 October, at the Faculty of Mechanical Engineering in Ljubljana, a well-attended discussion took place between Trân-Thi-Kim-Diêu and Andrej Detela, scientist, philosopher and writer, on Solving the Human Problems and Moving Beyond. The speakers covered the question of suffering, exploring what is its cause and how to solve it. As the discussion was very relevant, the questions that followed were up to point and touching everybody present.

The three programmes were extremely well received by members, sympathizers and new-comers. Before the end of the gatherings, a tentative plan for the next year's visit was already discussed.

For the Fellows-at-large in Slovenia
